MADE IN GERMANY

RETONE FLEX – the flexible cover evolution!

Coextrusion of PC and TPE elevates our flexible covers to new technical heights.

RETONE

The design of our revolutionary flex cover guarantees problem free mounting and dismantling even at low temperatures.

This is achieved by our TPE Coextrusion which creates a highly flexible sealing lip (see illustration).

RETONE FLEX solves any previous problems in regards to brittleness and breakability.

Available for the profiles R1, R2, R3, R4, R6, R8 and R13. Orders of coils up to a maximum length of 80 meter are possible.
